After evaluation of the price analyses, NBP may require that the amount of the Performance Security set forth in Clause ITB.32 be increased at the expense of the Successful / Most Advantageous Bidder to a level sufficient to protect NBP against financial loss in the event of default of the successful bidder under the Contract.

scope of subjectivity:

 - b) Comparing the bid price with the bids offered by other bidders submitting substantially responsive bids; and
 - c) Comparing the bid price with prices paid in similar contracts in the recent past by NBP or any other Federal or Provincial Department / Organization / Agency.
- 34.3 NBP will determine to its satisfaction whether the Bidder that is selected as having submitted the most advantageous bid is qualified to perform the contract satisfactorily, in accordance with Clause ITB.15 or Technical Evaluation Criteria.
- 34.4 The determination will take into account the Bidder's financial, technical, and production capabilities. It will be based upon an examination of the documentary evidence of the Bidder's qualifications submitted by the Bidder, pursuant to ITB 15 or Technical Evaluation Criteria, as well as such other information as NBP deems necessary and appropriate. Factors not included in these Bidding Documents shall not be used in the evaluation of the Bidders' qualifications.
- 34.5 NBP may seek "Certificate for Independent Price Determination" from the Bidder and the results of reference checks may be used in determining award of contract.
- 34.6 An affirmative determination will be a prerequisite for award of the contract to the Bidder. A negative determination will result in rejection of the Bidder's Bid, in which event NBP will proceed to the next ranked bidder to make a similar determination of that Bidder's capabilities to perform satisfactorily.
